Muhamad Rafli Shidiq

Fullstack Developer

Jakarta, Indonesia | +62 821-3471-6388 | muhamadraflishidiq@gmail.com
LinkedIn | GitHub | Portfolio

Full Stack Developer with practical experience in developing end-to-end web applications using Laravel, PHP, ReactJS, ExpressJS, Go, JavaScript, MySQL, and PostgreSQL. Successfully developed web-based solutions, including a training institution (LPK) management application, and gained professional IT support experience through an internship at PT PLN (Persero). Experienced in REST API development, frontend–backend integration, responsive UI implementation, and database management. Currently strengthening DevOps and deployment skills through Koda Academy's Full Stack Developer Bootcamp, with hands-on experience in Docker, GitHub Actions (CI/CD), Linux, Nginx, and SSH. Committed to writing clean, efficient, and maintainable code while continuously learning modern software engineering practices.

Experiences

Koda Academy – Depok, Indonesia **May – August 2026**

Fullstack Developer

E-Commerce – BeliMudah Web App | July – August 2026

- Developed a full-stack E-Commerce Web Application using ReactJS, Go (Golang), ExpressJS, and PostgreSQL, implementing a modern and scalable application architecture.
- Built responsive and interactive user interfaces with ReactJS, Vite, and Tailwind CSS, delivering an optimized user experience across desktop and mobile devices.
- Designed and implemented RESTful APIs using Go, including authentication, product management, shopping cart, order processing, and user management features.
- Containerized the application with Docker, configured Nginx as a web server, and implemented automated build and deployment workflows using GitHub Actions (CI/CD) in a Linux environment.
- Applied software engineering best practices, including Git version control, clean code principles, modular architecture, and collaborative development workflows.

LPK Ishikawa Nihongo Gakkou – Work From Home **July – Sep 2025**

Freelance Fullstack Web Developer

Web Company and System Administation Web App | July – Sep 2025

- Designed and developed the official LPK Ishikawa Nihongo website using Laravel, delivering a responsive, user-friendly interface with modern UI/UX principles.
- Built a comprehensive Student Administration Management System, including online registration, document submission, payment processing, and announcement management.
- Developed and integrated frontend, backend, database, and RESTful workflows to ensure seamless data synchronization between the public website and the administration system.
- Managed the full software development lifecycle independently, covering system design, implementation, testing, deployment, and ongoing maintenance as a Full Stack Developer.
- Optimized application performance, security, SEO, and system reliability while providing continuous technical support and feature enhancements based on institutional requirements.

PT. PLN UITJBT – **Bandung, Indonesia** **Sep 2024 – Jan 2025**

IT Support

- Provided IT infrastructure support by troubleshooting network connectivity, configuring routers, and maintaining office networking equipment.
- Supported the PLN Basketball Event by setting up projectors, cameras, Wi-Fi, and Zoom Meeting integration to ensure a smooth live streaming experience.
- Installed and configured Ubuntu Linux on dedicated development servers and assisted in server room maintenance across multiple PLN units under UIT JBT.
- Developed an IT Asset History Monitoring web application for the STI Division as an internal system and Final Project, contributing to digital asset management.
- Collaborated with the IT team to maintain network reliability, resolve technical issues, and support daily IT operations across the organization.

Education

Koda Tech Academy – **Depok, Indonesia** **May – Augt 2026**

Fullstack Developer

- Gained hands-on experience in modern web development using HTML, CSS, JavaScript, React.js, Tailwind CSS, Golang, Docker, Linux, SSH, GitHub Actions (CI/CD), and web server technologies.
- Built and deployed full-stack web applications by implementing responsive user interfaces, RESTful APIs, and modern development workflows.
- Collaborated with cross-functional teams to deliver real-world projects using Agile development practices and Git-based version control.
- Applied software engineering best practices, including clean code, problem-solving, debugging, and version control throughout the development lifecycle.
- Strengthened technical, communication, and teamwork skills through intensive project-based learning and collaborative software development.

Politeknik LP3I – **Bandung, Indonesia** **2022 – 2025**

Informatics Management | Associate Degree (Diploma III*)*

- Journal Publication on the Design of an IT Asset Monitoring Application for the STI Division of PT. PLN (Persero) Central Java Transmission Unit.

Skills

Frontend Development - ReactJS • JavaScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Responsive Web Design

Backend Development - Laravel • Golang • PHP • ExpressJS • RESTful API • JWT Authentication

Database - PostgreSQL • MySQL • SQL

DevOps & Deployment - Docker • Docker Compose • GitHub Actions • Linux • Nginx • SSH

Version Control - Git • GitHub

Tools - Visual Studio Code • Postman • Figma • Canva • Android Studio • Rest Client
